"These speakers seriously rocked on movies and the performance on two-channel music was so intoxicating that sometimes I started to feel the speakers were tailor made for whatever song I was listening to until the next song came on and then I thought the speakers were made just for that song. This is what you get with properly engineered speakers – you get performance that works for all sorts of material and uses." – **Jim Clements**

"Even in my large space, the Prestige 95Fs seemed content with what might be viewed today as average power. Like any speaker, of course, they could be turned up until either the amp or the speakers screamed uncle. I never reached that point—I stopped short of levels clearly higher than my normal listening. I found the Paradigms immensely rewarding in this application...I strongly recommend that those looking for speakers in this price range give the Paradigm Prestige 95F a serious audition." – **Thomas J. Norton**

"There are so many things about Paradigm's Prestige 95F floorstanding speaker that are worthy of discussion... Its inverted Active Ridge Technology surrounds, for example, which give the woofers greater excursion with less distortion and allowed Paradigm to really play around with crossover points in interesting ways... The exquisite design of the voice coil motors and internal wiring and all of the other components that most people will never have a chance to see...the Prestige 95F presses all of the right buttons." – **Dennis Burger**

"Paradigm has branched out from its self-imposed conventions in fabulous, Canadian-made style. The Reference Prestige 95F is a beauty of a loudspeaker, especially in its optional Midnight Cherry finish, the quality of which easily exceeded even my high standards. Paradigm appears to have come up with another winner!" – **Hans Wetzel**

"The new Prestige Series is a beautiful speaker, the design and aesthetic are superb... Every detail is well thought out; the lack of mounting screws, for the drivers, the brushed aluminum cones and rings, the slightly eased edges and that amazing finish... Sound is unmistakable Paradigm; the imagining is superb, dynamics are clean throughout without any midrange coloration... I've heard many, many speakers in this price range recently, but the Prestige 85F is more than a competitor, it leads." - **Piero Gabucci**

"It is easily one of the most sleek and elegant speakers you can buy in this price category... I find it hard to imagine any décor that they would not just complement but actually enhance...if aesthetics as well as build quality matter to you as much as sound quality, you would be well advised to give the Paradigm Prestige 85F a serious audition...you will be seduced into making these sonic babies a treasured part of your music system!" - **Malcolm Gomes**

"Even as a longtime Paradigm owner, I wasn't prepared for the performance their newest offering delivers. The Prestige 75F escalates past Paradigm strengths, adding a level of resolution and refinement that is rarely available at this price. Add major factory and dealer support and that adds up to a winner." - **Mark Marcantonio**

"I believe these loudspeakers can give more expensive offerings a run for their money. The 75Fs are smooth with very good top- and bottom-end extension. They throw a big soundstage and offer lots of detail... the midrange is transparent and delivers a lot of clean resolution... I'm comfortable calling the Prestiges the best speakers the company has ever engineered." - **Robert Archer**

"In the Prestige 15B, Paradigm has built a speaker that looks fantastic. But in hi-fi, looks are secondary to sound, and the sound of the 15B is second to no other bookshelf speaker I've heard near its price point." - **Jeff Stockton**
